

## Future Trips

Trips with outDate >= today are future trips.

## UI

When the app starts it should show the current trip if one exists. If no current trip exists but future trips exist the “Future Trips” view should be shown. If no current trip and no future trips, an empty view should be shown.

## Drawer tab

If no future trips exist, the link “Future Trips” should be disabled.

If no current trip exists, the link “Current Trip” should be disabled.

## Future Trips

Each future trip is shown with a separate card in a scrolling view.

The top area shows the brand (SC or OH), trip name, date, and what type of trip it is (flight or bus).

The top area should have a background color based on its brand; light blue for SC and yellow for OH.

The top area should show a plane icon or a bus icon to the right based on the trip type.

The main area should show the trip image faded, and the current passenger count. Here will be more information in the future!
