10:38 AM

Statistics

Passengers in total: 68

Excursion	Participants	Share
Excursion 1	45/68	82%
Excursion 2	32/68	60%
Excursion 3	68/68	100%

...

Three column grid.

The last column "share" includes all passengers participating in the excursion, either by having excursion pack or checked by the guide.

The contents of this view will change in future revisions. For now only the participant summaries are uploaded to the backend.

POST /api/v1/resources/departure/<departureId>/statistics
JSON
```
{
  excursions: [
  {"excursionId": <participant count>}, ...
  ],
  "totalPassengers": <passenger count>
}
```

N.B. The endpoint does not exist yet, this is just to get a general idea of what should happen.
